## Schell Road Maintenance Improvements Completed

SSJID recently completed maintenance work along Schell Road in the Knights Ferry area to address drainage issues and improve roadway conditions.

Work performed by SSJID crews included cleaning existing culverts, restoring drainage pathways, constructing drainage swales, removing vegetation that was restricting drainage, and restoring roadway shoulders and turnouts with aggregate base material. Utility potholing was also completed to verify underground utility locations and ensure the work could be performed safely.

These improvements were completed to help reduce standing water, improve drainage during storm events, and minimize future roadway erosion and maintenance concerns. SSJID will continue coordinating with Stanislaus County as the County completes additional maintenance activities within the right-of-way that will further enhance drainage performance in the area.

The project was performed entirely by SSJID field crews. SSJID appreciates the efforts of the Operations and Maintenance crews whose work helped improve drainage conditions and roadway functionality for the local community.
